

# TeleTrader Media Solutions

Professional Finance Information for Print and Online.  
Fast. Efficient. Flexible.

→ **PDF-Service**

Ready-to-print pages with price lists, charts and graphics in the layout of your publication

→ **Publisher**

The editorial solution for flexible publishing of charts in print and online media

→ **Financial Portals**

Web pages with market data for your media portal

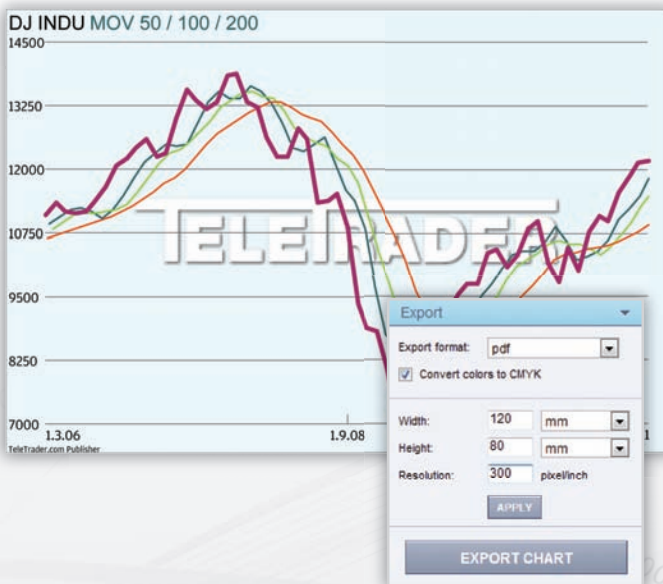

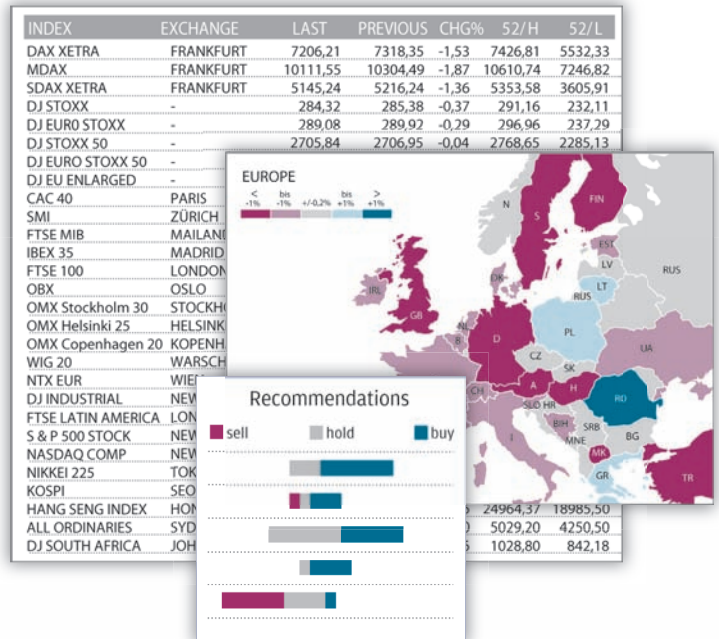

## PDF Service

Ready-to-print pages according to your specifications

The market data sections of newspapers, magazines and other print media are often created manually or half-automatic. This can result in substantial running costs in the production process and is prone to errors.

**The TeleTrader PDF Service makes it possible to fully automate this process and completely swap it out.**

We create complete pages consisting of price lists, charts, top/flop lists and innovative graphical elements for the market data section of your publication. The elements are prepared according to your specifications, layout as a PDF and automatically delivered at the appointed times.

## TeleTrader Publisher

Create publishable charts anytime

As a copy editor you would like to position the current chart next to the current report. Of course, in the layout of your medium and without having to engage a designer. This in your own work area. And you can enhance the chart with a note, trend lines and an indicator.

**The TeleTrader Publisher makes it possible for any copy editor to create print-ready charts in the web browser at their work station at a moment's notice.**

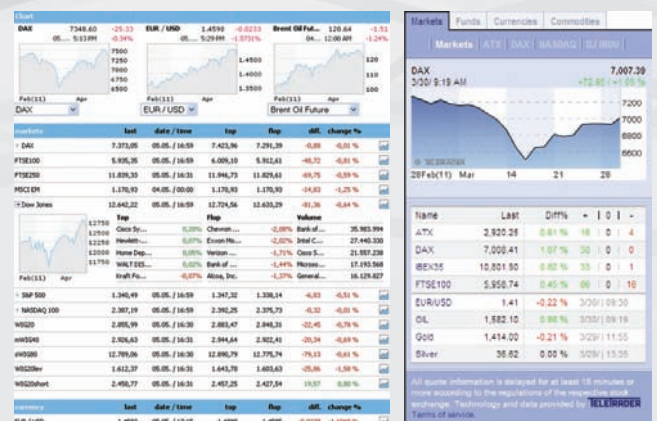

The Publisher works with master templates which are adjusted once to the layout of the publication. The publisher can then make further adjustments, select securities and export completed charts for the publication.

## Finance Portals

Integrated market data for your online presence

For your online presence, TeleTrader offers you **tailor-made elements** which are adjusted to your design and layout and can then be augmented with your own content. Within a project, a fully integrated financial portal will be produced.

Using our **Market Info Box** you can offer your readers a comprehensive overview of the development of selected indices, mutual funds and currencies. This allows you to handle the integration with little effort and cost.
